CDHF Raising Money for the following items during "Light Up 2011"

3 New Space Lab Cardiac Monitors for the CDH Emergency:

The Castlegar & District Hospital Foundation (CDHF) asks for your support as we raise money for 3 new cardiac monitors for the CDH Emergency. We need to replace 3 old monitors. The one monitor purchased recently by the Castlegar & District Hospital Auxiliary will be set up permanently in caring for infants and children as it becomes necessary. The 3 new monitors are linked, so that if the nurse is busy with one patient, he/she can view the other monitors from another patient's bedside.

The monitors would link with Kelowna and other IH sites, so that the ER physician in Castlegar can call a specialist and that specialist can view real time patient monitoring data while speaking with the Castlegar physician. This will improve patient care and comfort and augment treatment options for Castlegar physicians.

In critical situations when life saving measures are occurring, the nurse or physician will be able to print out the data from the monitor at any time during or after the event to ensure that documentation standards for ER are met. These monitors would greatly improve the care of all severely ill patients in the Emergency Department at the Castlegar Health Centre.

Life Pak 15 Crash Cart Monitor/Defibrillator:

Monitor/defibrillator is used to defibrillate a patient in the event of a cardiac arrest; or other cardiac event. Transfer of patients would be made safer as there would be a fully functioning reliable monitor/defibrillator.

CADD Prism Pump: Will be used in Emergency & Home and Community care nursing. This pump will be used to deliver IV medications for ambulatory patients.
